ADDITIONAL INFORMATION SUPPORTING njd (e.g., paragraph 1 site conditions; paragraphs 2-3 rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 site information on waters of the U.S. occurring onsite):

A Wetland Delineation was received on 2/5/2007 from Natural Resource Consulting for Corps concurrence and Jurisdictional Determination. After reviewing data sheets, USDA soil surveys, wetland inventory maps and aerial photographs the Corps have found that wetlands 2,4,6 and 7 are isolated. These wetlands have no surface water resources that are adjacent or tributary to any water of the US. No interstate commerce nexus was found. These wetlands are therefore not subject to regulation by the Corps of Engineers.

Wetlands 1,3 and 5 lie along a tributary to the Milwaukee River, a navigable water of the US. These wetlands are subject to Corps of Engineers jurisdiction.
